

Overview

Environet Connect is a cloud-connected, critical infrastructure monitoring solution that supports partners, managed service providers, and end users. It is a powerful, value-add solution to Vertiv and third-party hardware – supporting both via SNMP communication.

Benefits:

- Cloud-connected, web-accessible interface
- Increase your operational awareness and visibility into critical equipment
- Monitor your devices quickly and easily via an intuitive, user-friendly UI
- Save time with easy setup and monitoring
- Identify trends to plan and optimize operations across all physical locations
- Communicate with critical equipment via IP-connected devices (via SNMP)
- Global navigation allows users to see what is most important in each facility
- Enhanced management features to show alarm and device data for multiple tenants

Use Environet Connect to monitor your data center. Start today.

Monitoring software in the cloud ensures uninterrupted operations, optimal performance and scalability.

With Vertiv™ Environet™ Connect, deploy critical monitoring software that is affordable and easy to use. This cloud-connected solution provides superior monitoring, alarming, trending, and data organization capabilities for companies in such verticals as healthcare, financial services, education and more. Environet™ Connect will push your business towards greater efficiency with fewer risks to worry about.

Environet Connect provides the following benefits to help your business growth and reach greater capacity:

- **Cloud Connectivity:** Environet Connect supports both Vertiv and 3rd party equipment and cloud connected
- **Proactive Monitoring:** Use With its robust reporting and trending features, Environet Connect users get a full view of the condition of critical equipment.
- **Flexible Expansion:** Environet Connect supports both Vertiv and 3rd party equipment. The cloud-based connection delivers real-time results while being flexible and scalable.
- **Full Featured:** Environet Connect is a fully capable monitoring software with support for all user types within your business.
- **Available and Ready:** Ensure continuous operations and maintain your service-level agreements with high-availability in the cloud.
- **Streamline device management:** Integrate Environet Connect data with other networking management tools for easier management.
- **Start-Up Services:** Use our optional starter pack or purchase advanced services for a more comprehensive installation.

- **Increase your business flexibility:** Manage both Vertiv and non-Vertiv equipment.
- **Scale Across Locations:** Environet Connect scales up to one thousand devices in a single instance, supporting your business growth.
- **Scalable Pricing Plans:** Environet Connect makes it easy for SMBs and enterprises to deploy in data centers, edge sites, and/or remote offices.
- **Provisioning Tools:** Adds the ability to configure new Vertiv equipment in bulk at initial and post-installation.
- **Firmware Management:** Update firmware at the card level for supported Vertiv equipment.

Technical Specifications

Requirement	Minimum	Recommended
Operating System	Windows Server 2019	Windows Server 2022 Linux
CPU (Intel or AMD)	4 CPU 2.0 GHz or Higher	(Intel or AMD) ≥6 CPU ≥2.2 GHz or Higher
RAM	8 GB	≥16GB
Disk Space	100 GB	≥300 GB
Disk I/O	15 MBps read/write speed	≥200 MBps read/write speed
Network	10/100 MBps	≥1Gbps
